Professional Summary

AI & Full-Stack Software Engineer with experience designing scalable software systems, Generative AI applications, Agentic AI workflows, cloud-native backend services, REST APIs, and intelligent automation platforms. Strong background in Python, Django, React, FastAPI, PostgreSQL, Flutter, LLMs, Retrieval-Augmented Generation (RAG), OCR, distributed systems, and software architecture.

Skills & Technical Competencies

- **Core Competencies:** Artificial Intelligence, Generative AI, Agentic AI, Full-Stack Development, Machine Learning, LLMs, RAG, REST APIs, Microservices, System Design, Cloud Computing, Distributed Systems, Software Engineering
- **Programming:** Python, JavaScript, TypeScript, SQL, HTML5, CSS3, C, C++, Dart
- **Frameworks:** React 19, Next.js 16, Django 5, Django REST Framework, FastAPI, Flutter, Node.js, Redux, Tailwind CSS, Vite
- **AI / ML:** Generative AI, Agentic AI, LLMs, RAG, Google Gemini, Veo 3.1, LangChain, OCR, NLP, Prompt Engineering, Context Caching, Function Calling, LLM Evaluation (LangSmith, RAGAS)
- **Cloud, DevOps & Databases:** Docker, AWS EC2, AWS S3 (Basic), Redis, Celery, PostgreSQL, SQL, Git, GitHub, CI/CD, Render, Microservices
- **Methodologies & Keywords:** Agile, Scrum, RESTful APIs, Object-Oriented Design, System Design, Software Architecture, Authentication, JWT, OAuth, Database Optimization, Scalable Architecture

Work Experience

The Janki — *Software Development Intern* Jan 2026 – Jul 2026
Shori (Enterprise E-Commerce Operating System) — *AI & Full-Stack Engineering*

- Orchestrated 5+ Gemini 2.0/2.5 Flash AI agents with Context Caching, Meta LLM workflows, and RAG pipelines using Chatwoot webhooks, order histories, and ledger data to deliver grounded responses under 250ms latency.
- Deployed Gemini Vision workflows that automated invoice extraction and email parsing, reducing manual logistics entry work by nearly 80%.

Product Sheet (Jewellery ERP) — *Full-Stack Engineering*

- Architected a scalable 9-module Django REST backend comprising 50+ REST endpoints with JWT authentication, PostgreSQL, Redis, Celery, and OpenAPI specifications supporting enterprise workflows.
- Delivered a Next.js 16 / React 19 dashboard supporting secure stateless JWT session handling, Excel processing (1,000+ records via SheetJS), PDF parsing, and real-time interactive analytics.

Tag11 — *Frontend Development Intern* May 2024 – Jul 2024

- Constructed 12+ responsive React.js and Tailwind CSS web interfaces, integrating 20+ REST APIs and reducing overall UI development time by 30% through reusable components.

Projects

CampaignOS – AI Video Creation Operating System React 19 · TypeScript · Vite · Gemini 2.5 · Veo 3.1

- Engineered an AI-powered SaaS video generation platform for marketing automation, multimodal content creation, storyboard generation, media processing, and LLM-powered campaign orchestration via Gemini 2.5 and Veo 3.1.
- Designed a client-side execution pipeline leveraging FFmpeg WebAssembly, asynchronous polling, and prompt parsing, cutting server-side video infrastructure costs by 100%.

Federated Learning for Healthcare Python · TensorFlow · Federated Learning

- Created a distributed machine learning and privacy-preserving AI framework implementing federated optimization and secure aggregation across 5 hospital nodes without raw data sharing.
- Maintained 94% model classification accuracy while ensuring zero patient data leakage across decentralized environments.

AI Document & Resume Intelligence Platform Python · OCR · LLMs · NLP

- Engineered a document intelligence platform with semantic search, vector search, RAG, embeddings, and OCR, achieving 95% information retrieval accuracy.
- Streamlined document parsing workflows to reduce resume screening evaluation time by 70% across enterprise evaluation pipelines.

JKLU Eezzy – Smart Campus Super-App Flutter · Dart · REST APIs · JWT

- Developed a cross-platform mobile application unifying 6 campus services with REST API integration, role-based access control (RBAC), offline synchronization, and local storage for 1,000+ active student users.
- Implemented a protected JWT auth gateway, offline contact caching, PDF rendering, and multipart file uploads across 40+ interactive app screens.

Education

B.Tech – Computer Science & Engineering Aug 2022 – Jun 2026
JK Lakshmipat University, Jaipur

Relevant Coursework: Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Software Engineering, Machine Learning.
